

Fort Worth, TX | January 2019

Technologies and Strategies to Achieve Facility Information Management (FIM) Excellence

Michelle Ellington

FIS Manager

Facilities Information Services

michelle.ellington@uky.edu

859-257-3703

PRESIDENT

Since 2015

Course Goal

Note: instructional graphics and system screenshots shown in slide deck were created by the University of Kentucky unless otherwise noted

- Discuss FM technology advancements for effectively managing facilities information
- Focus on important components and success pathways of each
- Evaluate organizational management strategies to support successful implementation

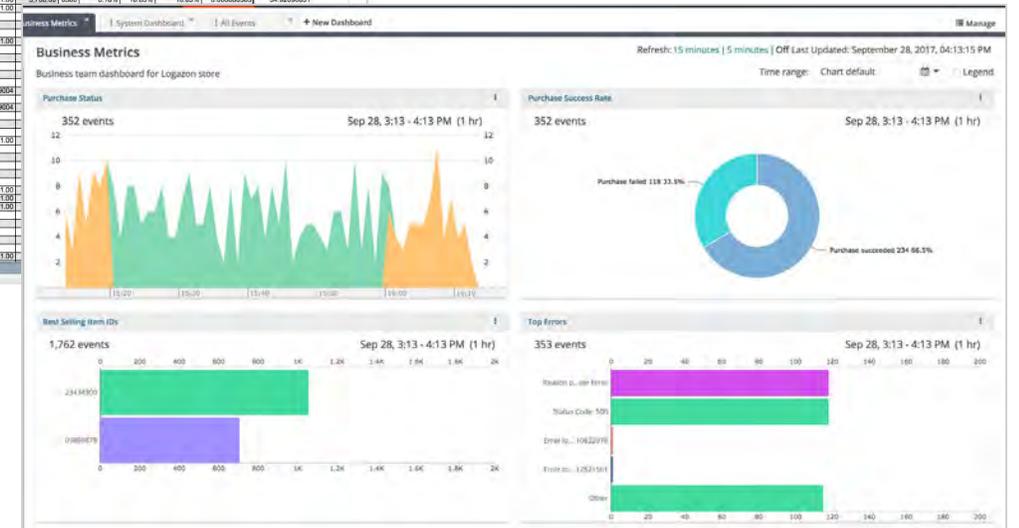

Big Gorilla Business

What Facilities Owners Want

Timely access to **current** information, **when** you want, **how** you want it.

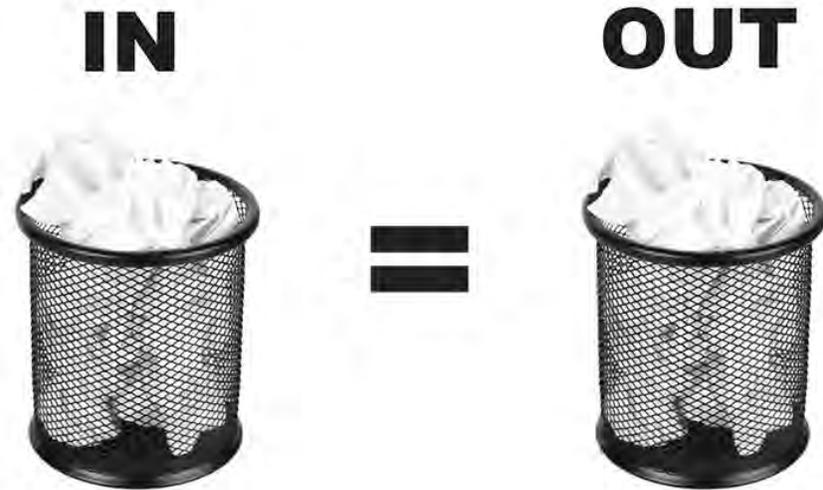

Company	Code	Date	No.	Price	Total	Blng	Pre	Capital	Current	Current	Dir	Cap. Ret.	Div	Total Retur	Wgted Div	Wgted Av	Days Hld
Fernz Corp S	S N	NZ	11-Mar-08	1,000	8.24	8,240.00	60.50	500	100.00	100.00

Challenge

The quality of the input determines the quality of the output. In other words, in a processing system, the data's quality coming out cannot be better than what went in.

Garbage In Garbage Out

Key Elements of FIM Excellence

People | Processes | Technology

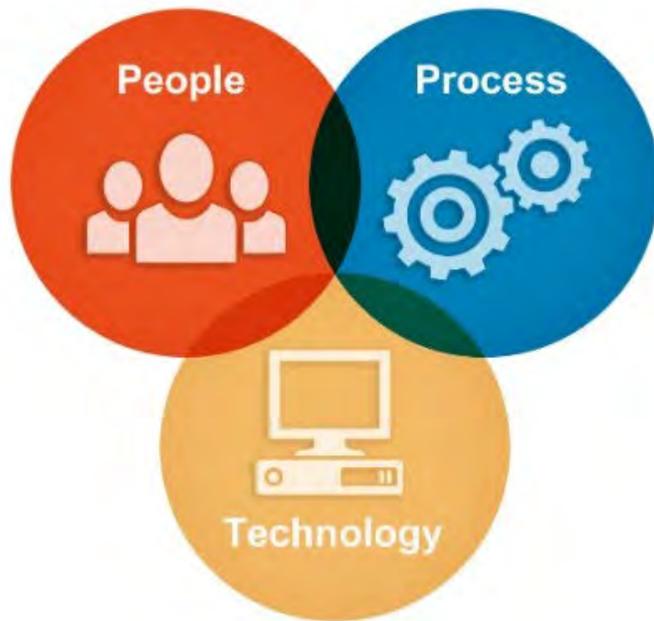

FIM Excellence – Seamless Flow of Facility Information

- **Processes** that support system development
- **People** dedicated to *continuously* improving systems and data
- **Technologies** that support your people, processes, and information needs

Managing Change --- Smart Campus Design --- Standardization --- System Integration --- System & Data Governance

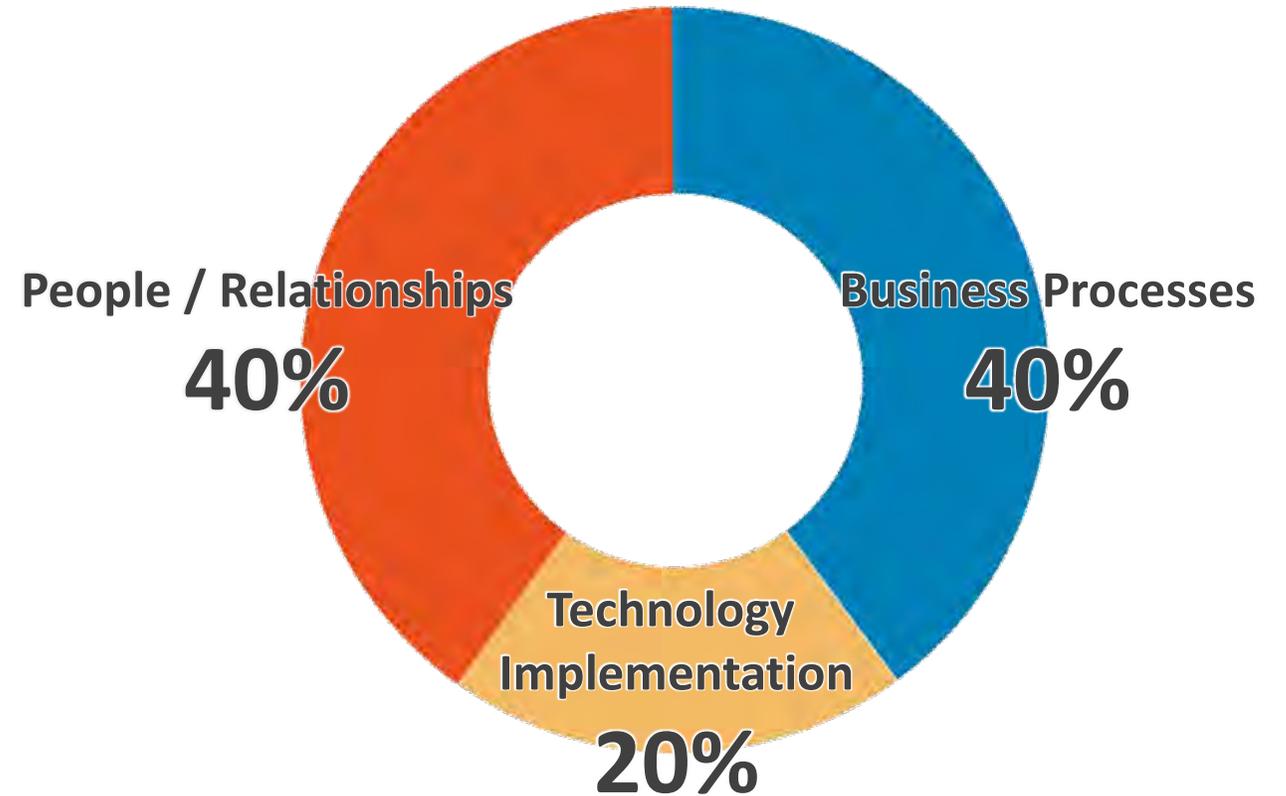

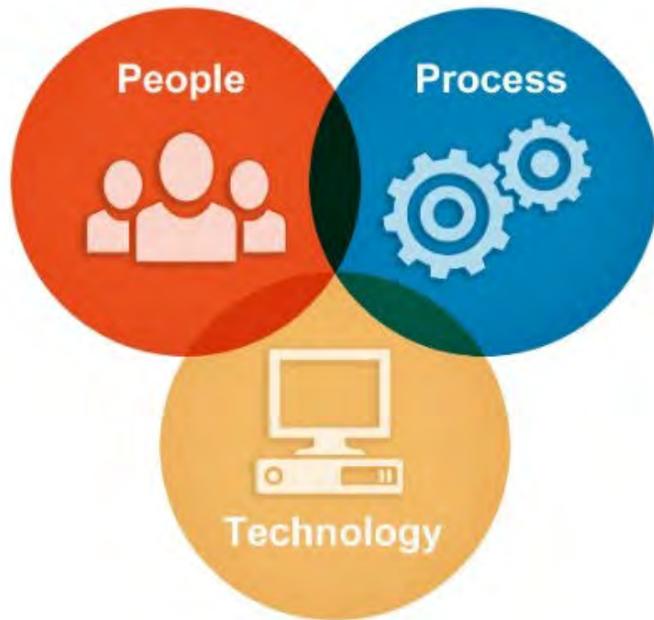

--- Employee Empowerment --- Thinking ahead to find ways to use technology to best manage facility information

Key FIM Elements

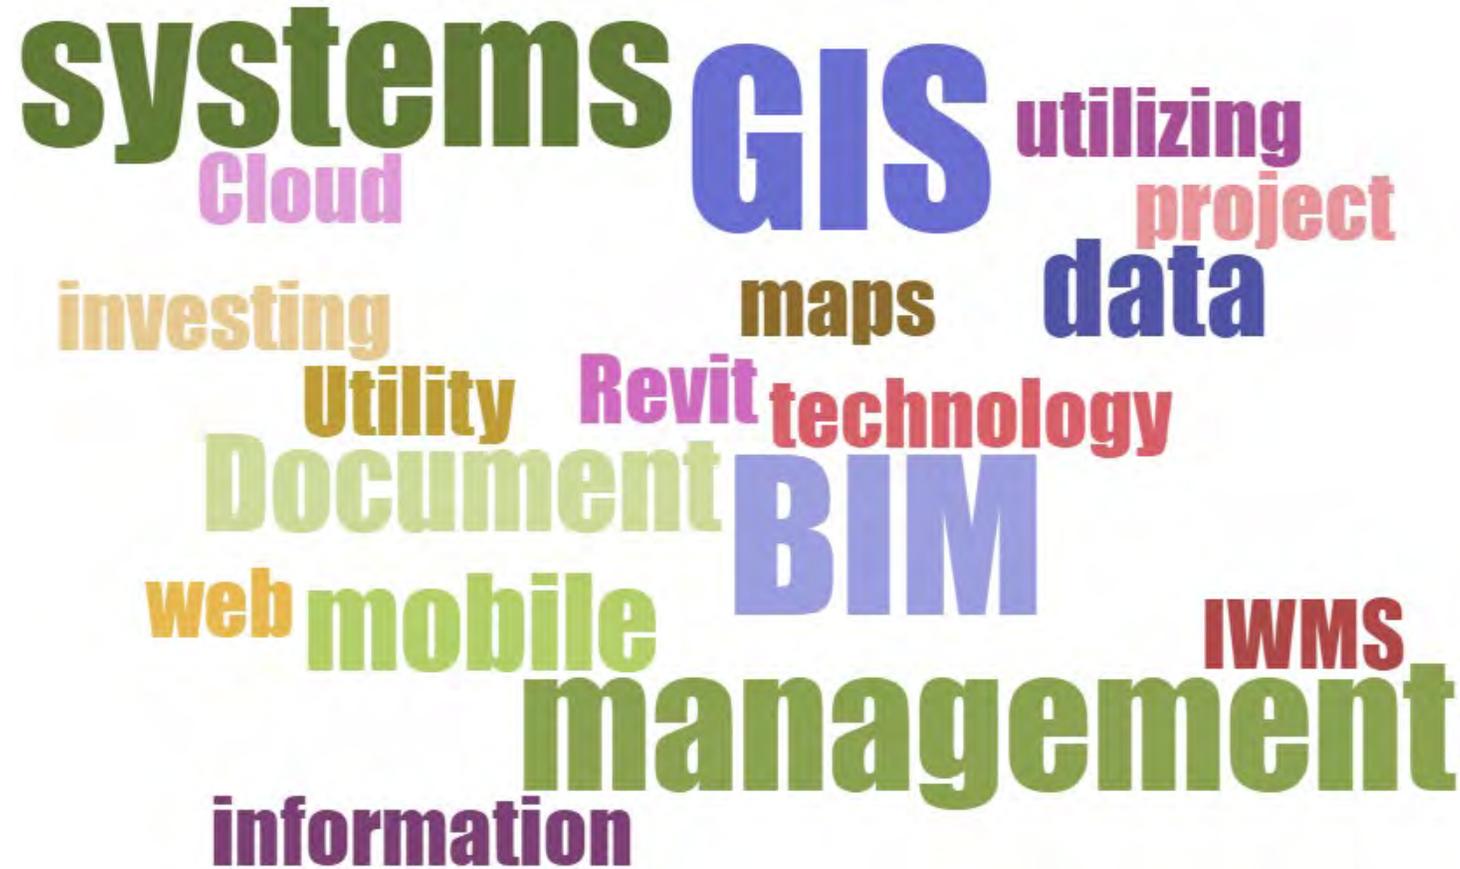

Percentage
breakdown of
each?

Key FIM Elements

Technology has transformed the way
higher-ed institutions operate

What FM technology advancements are you re-defining internal strategies for?

FIM is Technology Agnostic

Note: Solutions shown represent a subset of available solutions and are listed for discussion purposes only.

Smartphone

BIM

GIS

ERP

Database

BMS, CAFM, CMMS, IWMS...

Base Your Decision On:

- What information is most important to my institution?
- What enterprise systems does my institution currently use?
- How much can I afford?
- Will the system I want integrate with our existing critical systems?
- What is required to maintain the system information and infrastructure?
- Do I have the right people to manage the system?
- What is our long term plan and will this technology enable our success?

FIM Technology Advancements

Geographic Information System (GIS)

Building Information Modeling (BIM)

Integrated Workplaces Management System (IWMS)

GIS – Geographic Information System

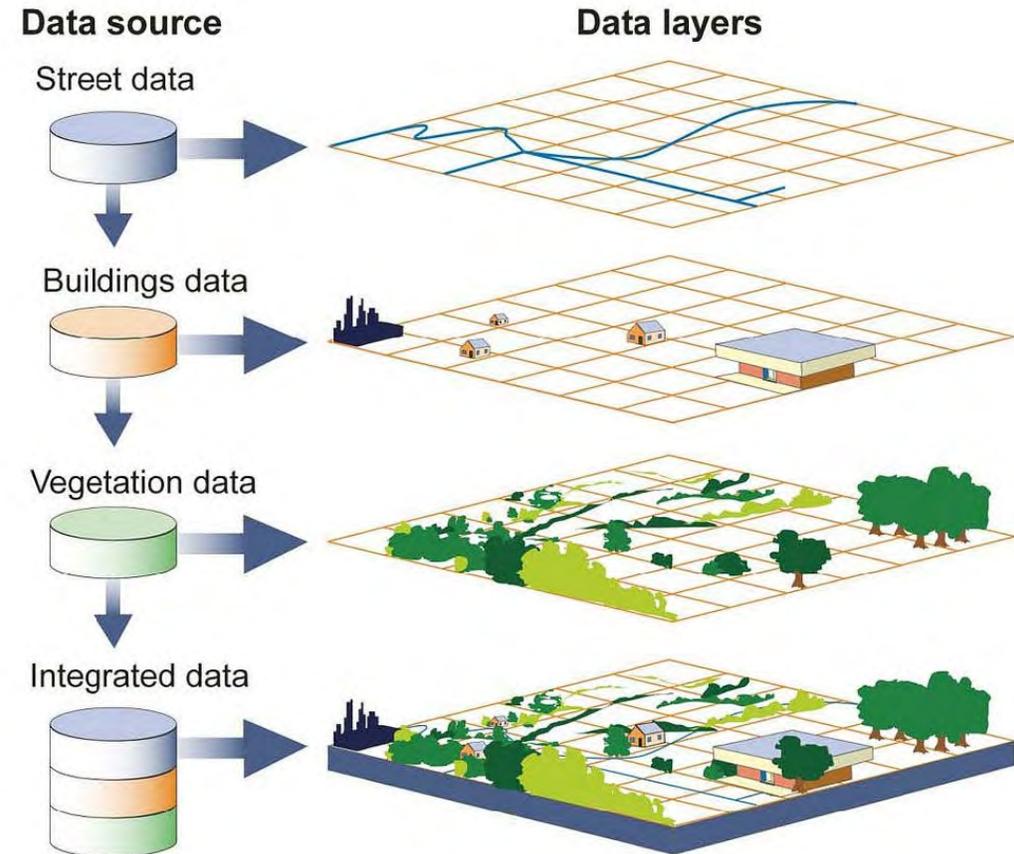

\ˈjē-, ˈī-, ˈes \

GIS is....

- A system to capture, store, manipulate, analyze, manage, and present all types of geographic data
- Requires processing methods
- The standard for enterprise mapping and web map publishing

GIS is NOT...

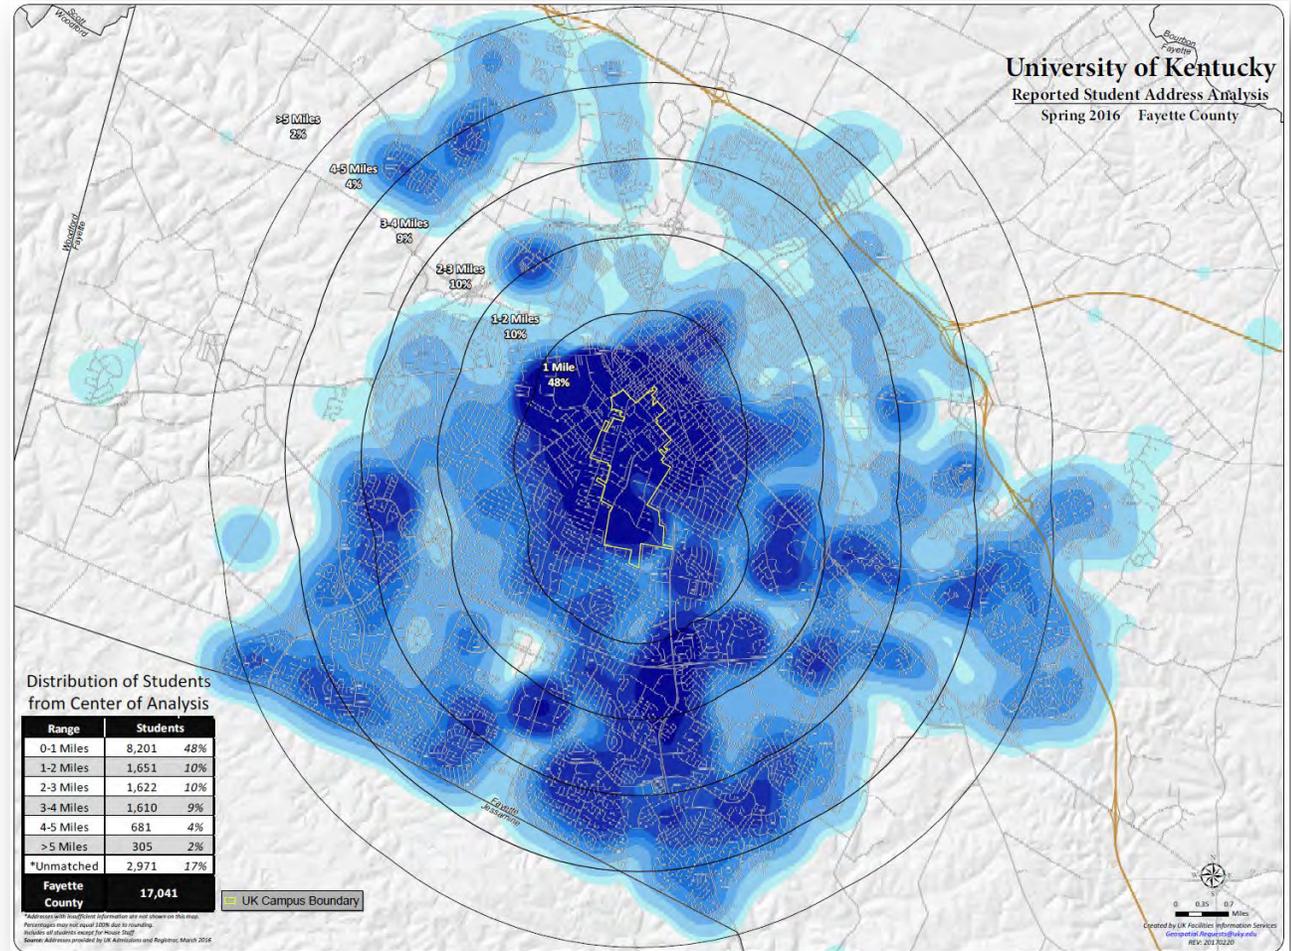

- Just a map or pictures
- A file format (it's managed as a database)
- Software

Why GIS?

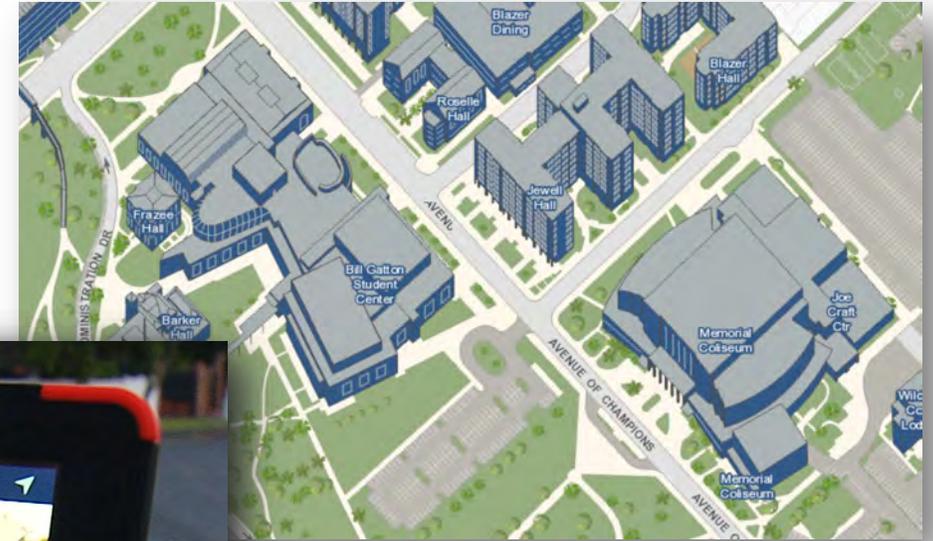

- A living graphical representation of your physical assets for wayfinding and analysis
- Computable Geometry (“geoprocessing”)
- A database that can easily integrate with other databases
- Easily deployed to web and mobile
- Customizable
- Scalable

GIS – Critical Datasets

- Basemap
- Floorplans
- Utilities

...also imagery

Use Case: GIS

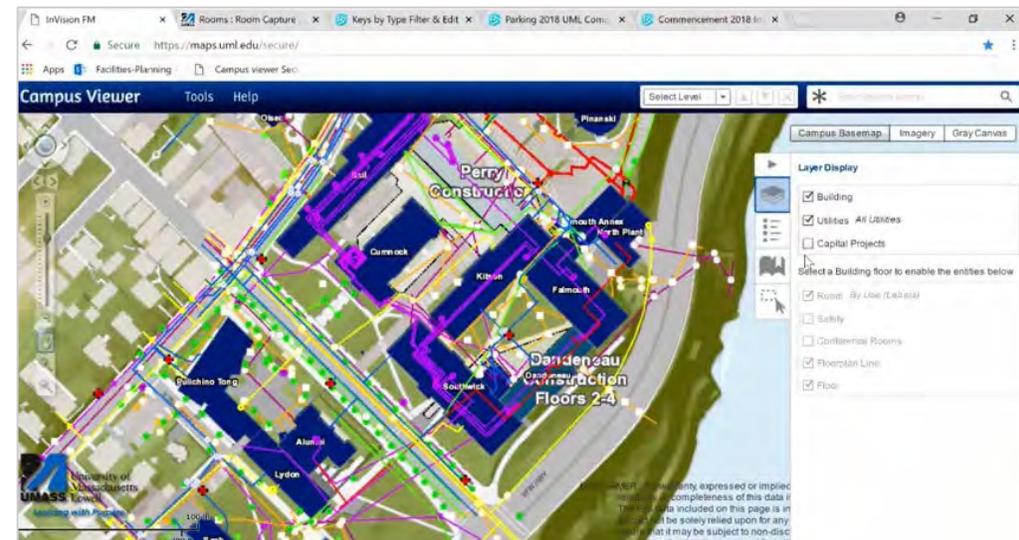

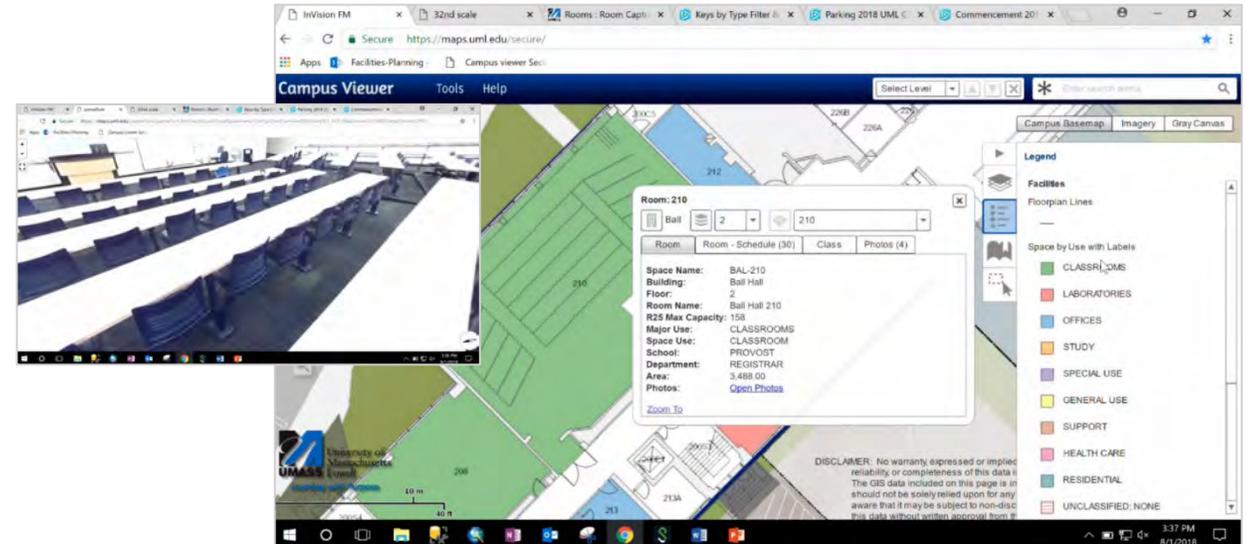

Situation

Wanted to: view *campus level* information including basemap, utilities, and large capital projects. | view *building level* information including occupants, active AEP* projects, floor plan docs, building archives. | view *room level* information including usage, ownership, room schedules, utilization studies, classroom capacities, seating types, photos.

Result

Created Campus Viewer web application to pull all information together. System integrated with existing floor plan and building archived documents. Used 360 camera to capture room photos.

*Accelerated Energy Program

Use Case: GIS

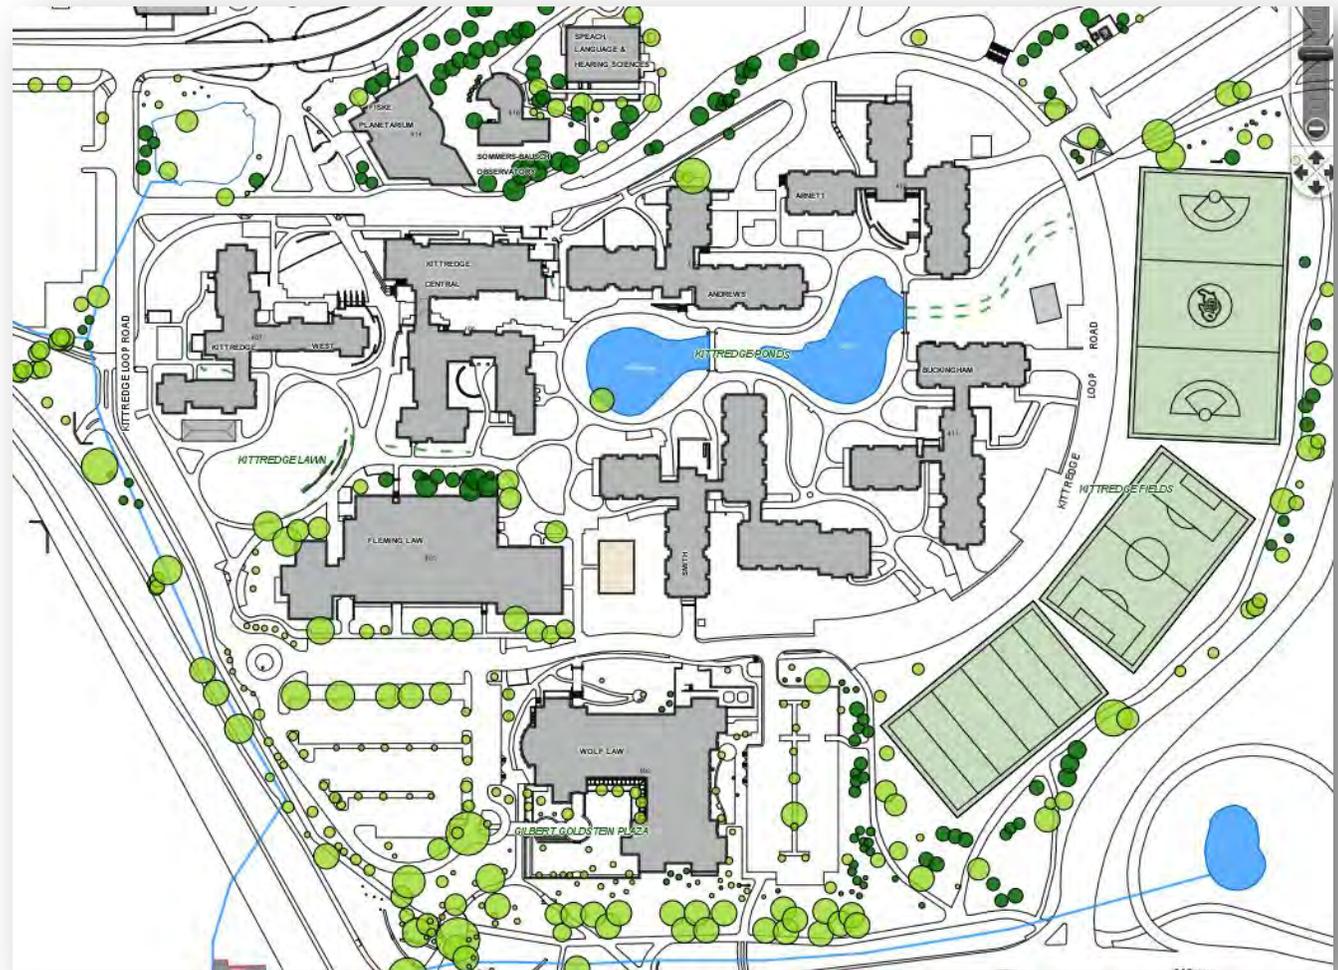

University of Colorado
Boulder

Situation

Wanted to create a tree inventory system to track ownership, maintenance, tree zone, storm damage (moderate-severe), trees with memorial/donation plaque. Planned for digital transfer from paper archives, managing treatment of infestations, measuring canopy coverage for the Tree Campus USA certification.

Result

Tree inventory effort launched in Spring of 2012. Was complete in time to be proactive with responding to the Emerald Ash Borer (EAB) infestation alert in September 2012. GIS enabled Grounds to be proactive with treatment and efficiently plan, budget, strategize, and deploy treatment effort.

GIS – Key Strategies

- Identify Internal Champion
- Create “One Map” [\[Audit\]](#)
- Main Campus Website Integration
- Partner with IT
- Implement Processes and Procedure [\[Process\]](#)
- Standardize [\[Standardize\]](#)
- Deploy Enterprise Solutions [\[Automate\]](#)
- Collaborate & Integrate
- Outreach and Education

Beware of systems that look like GIS but aren't

BIM – Building Information Modeling

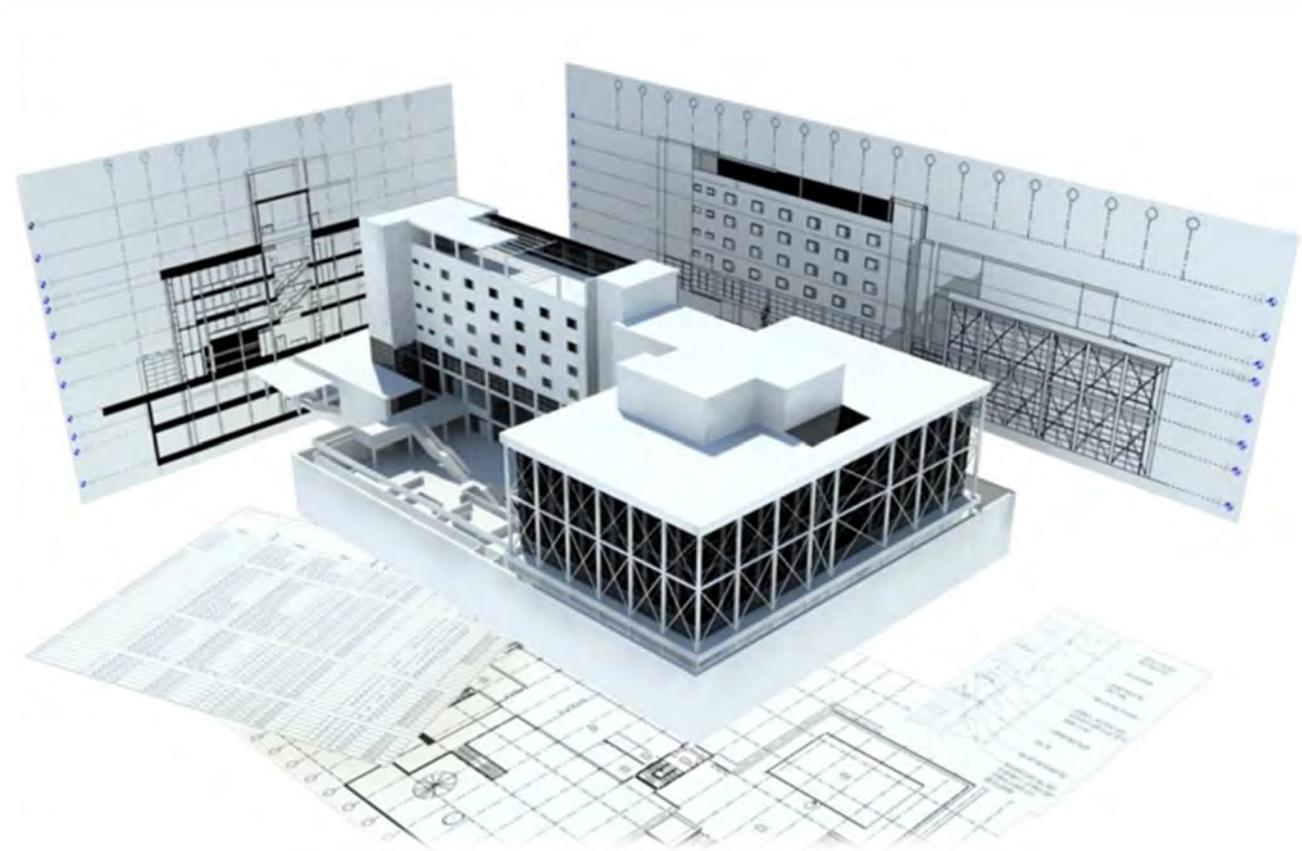

\'bim\

BIM is....

- A business model defined by processes and workflows
- The standard for building design, construction, and operation
- Integrated geometry & facility information
- Mandated in many countries*

BIM is NOT...

- Just 3D modeling
- A file format
- Software

**Global BIM Standards: Is Your Country Next*

<https://constructible.trimble.com/construction-industry/global-bim-standards-is-your-country-next>

Tennessee State Government

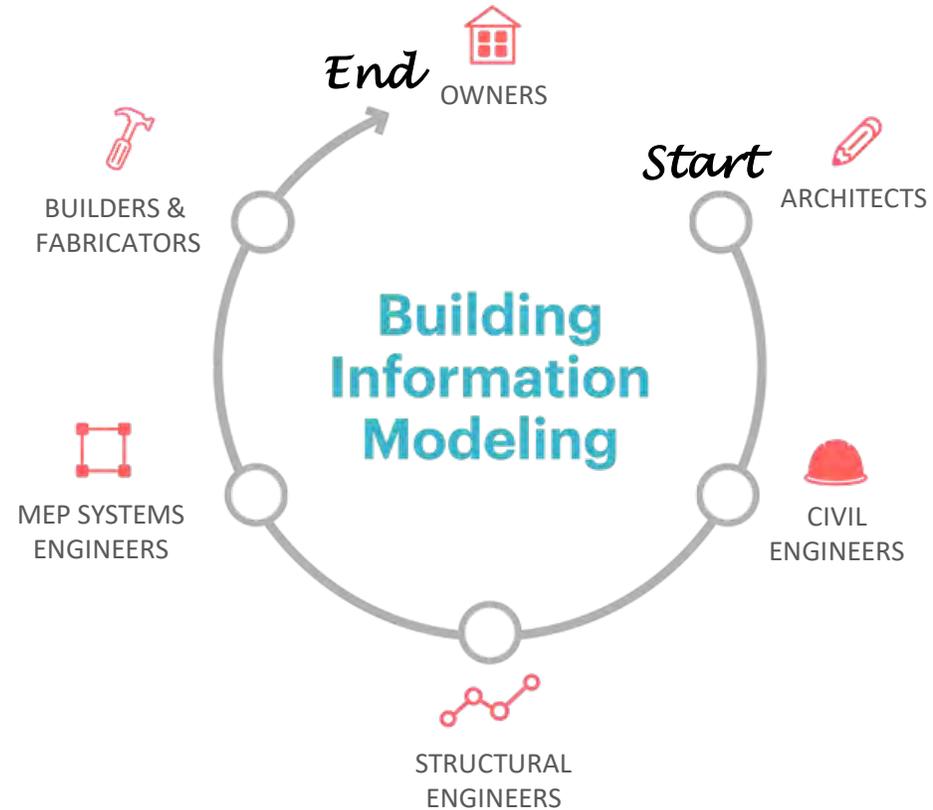

<https://www.tn.gov/osa/capital---real-estate/capital-projects/bim-standards.html>

Image Credit: Google Images

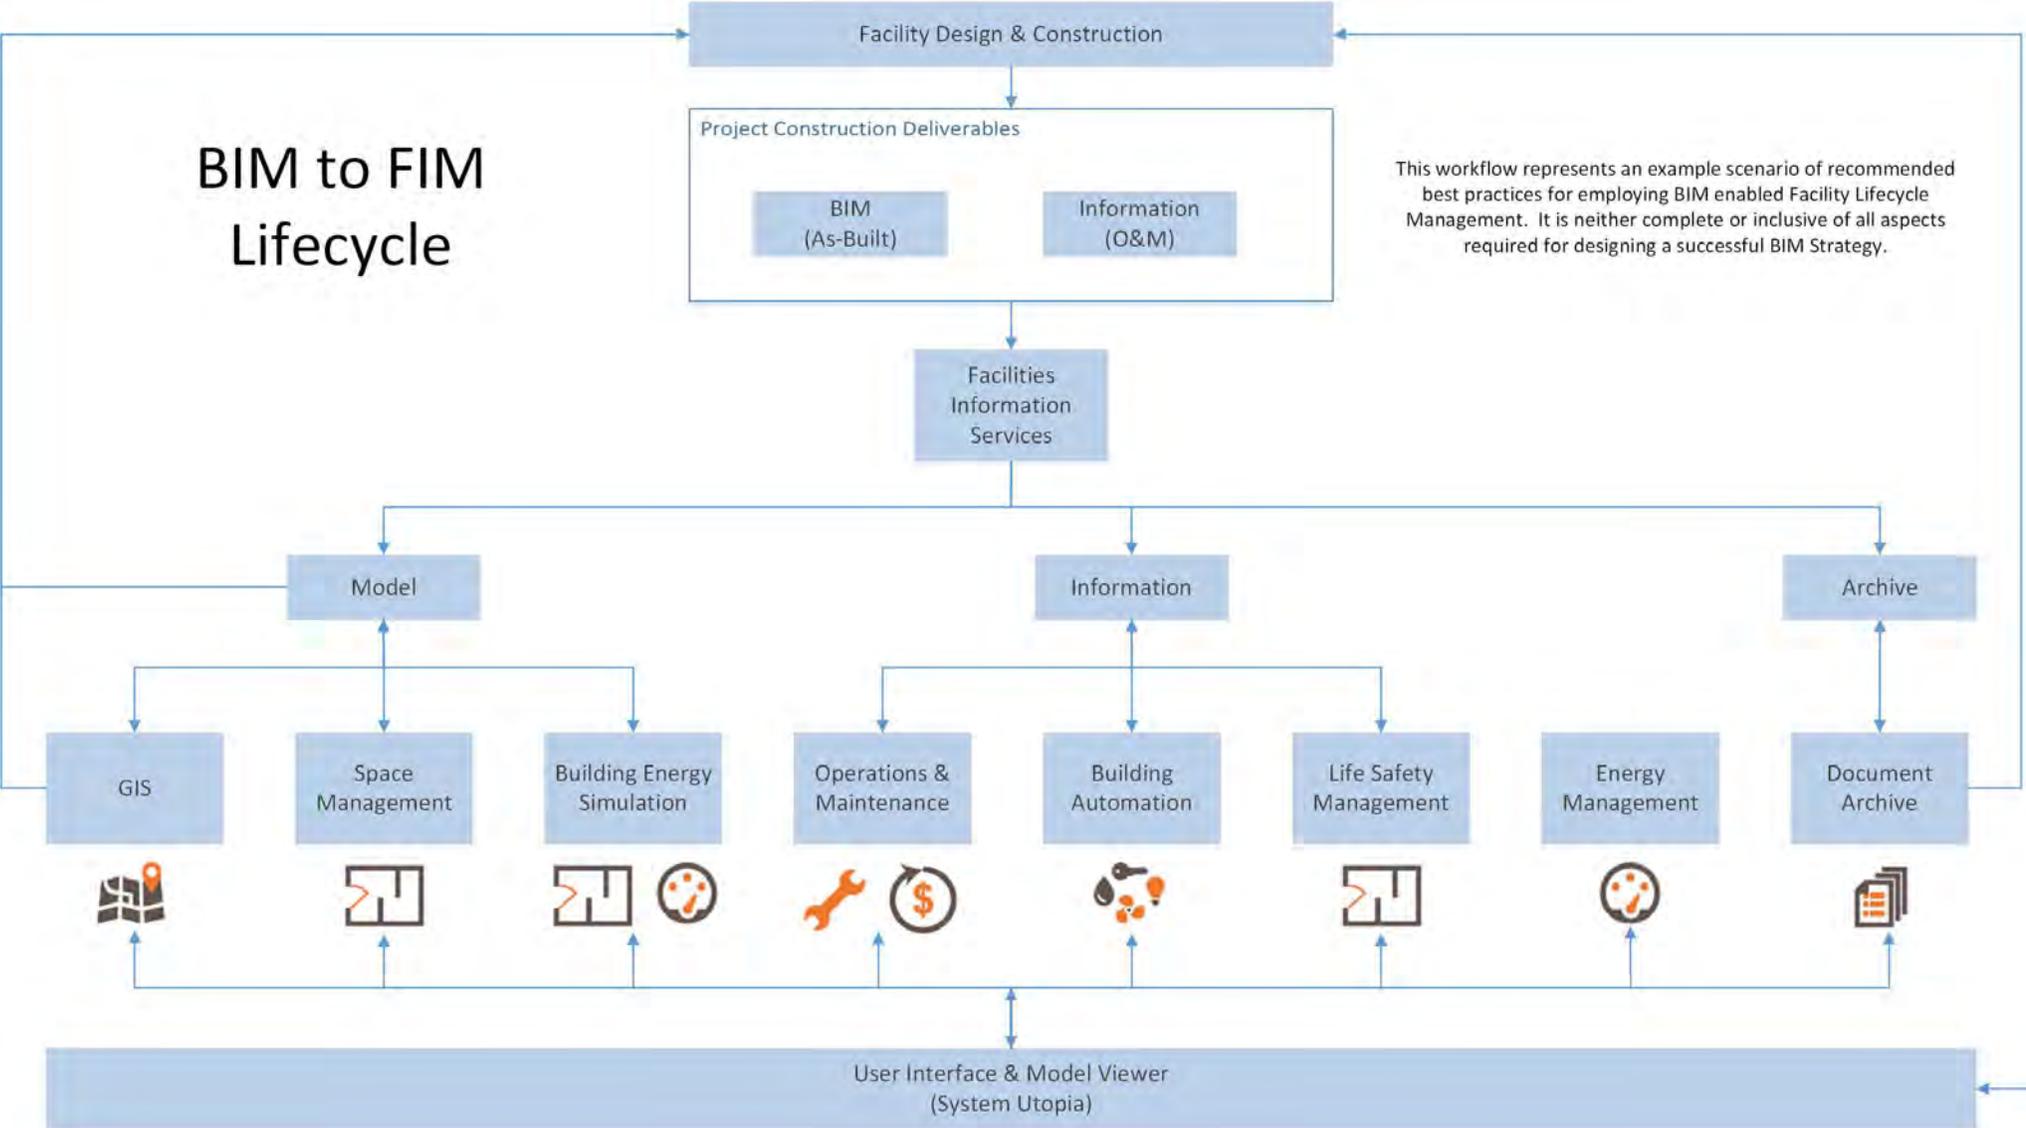

Why BIM?

- Risk Mitigation
- Higher Quality
- Increased Productivity
- Streamlines Handover

BIM – Architecture Strategy

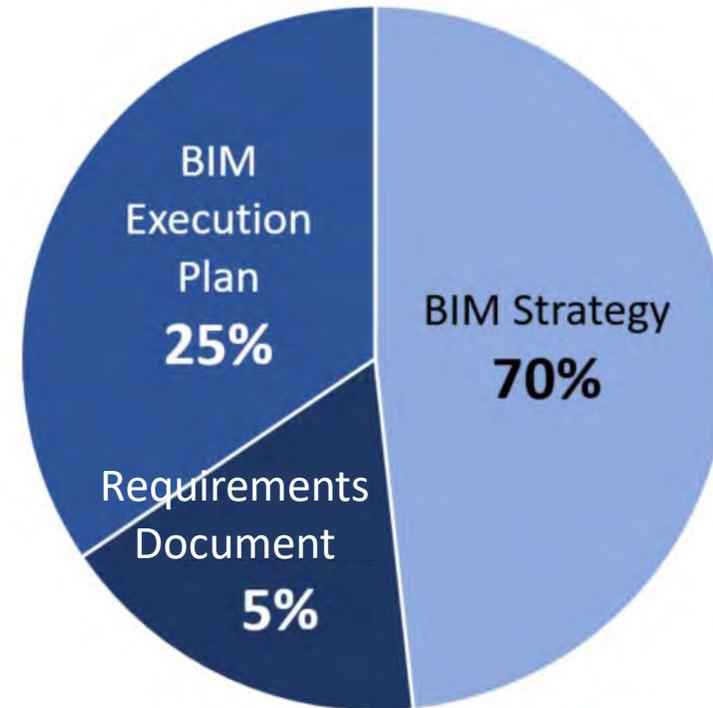

Developed in partnership between Messer Construction and the Campus FM Technology Association

BIM – 3 Main Components

- BIM Strategy
 - Define Goals & Metrics
 - Layout Tactics
 - Develop Roadmap
- Requirements Document
- BIM Execution Plan

Other useful components include a feasibility study and “BIM 101” session for administrators

BIM – Level of Development (LOD)

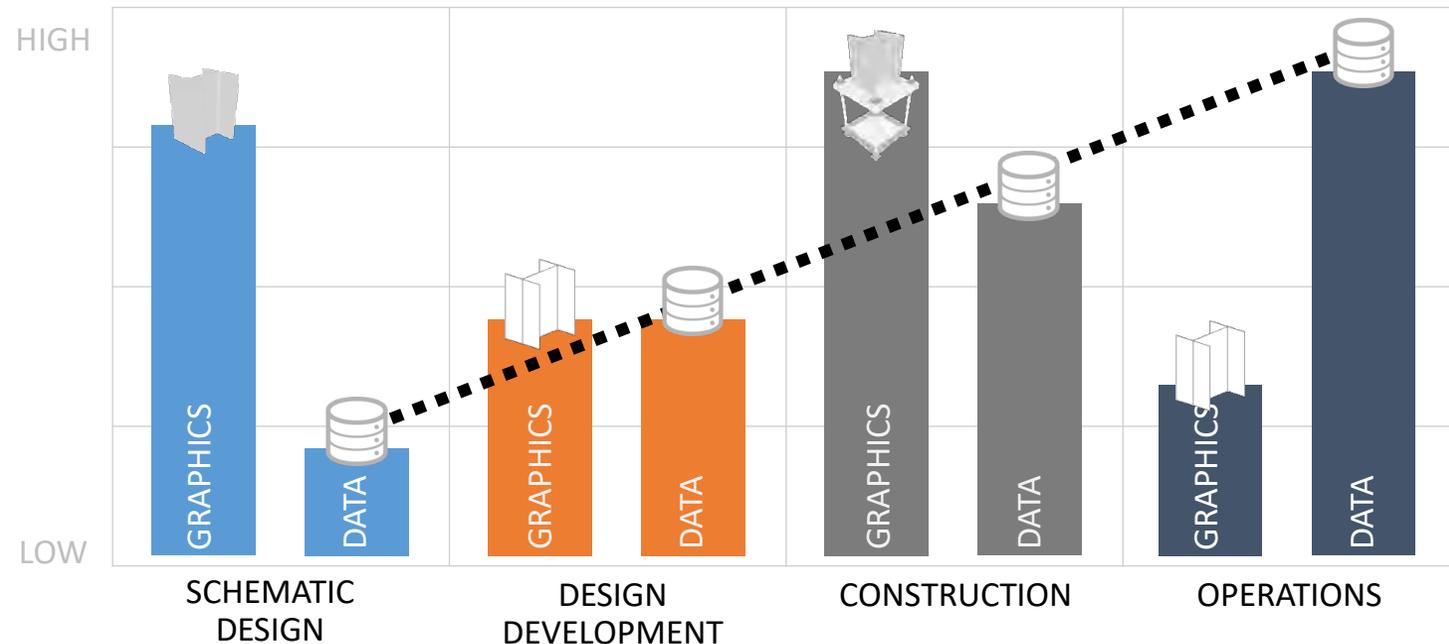

- Construction Needs

- Maximum graphics
- Minimum data

- Owner Needs

- Minimum graphics
- Maximum data

★ Avoid “Model Bloat” by determining what you don’t want in the model (BIM Strategy)

Graphic provided by:

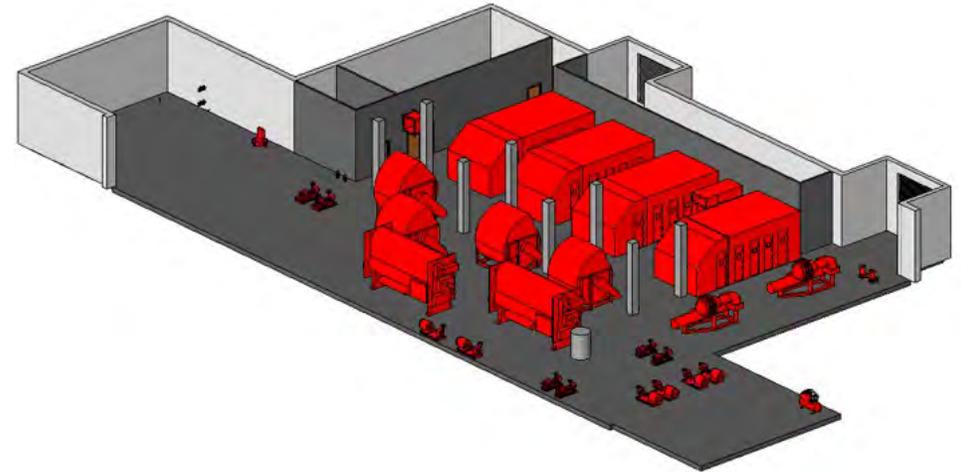

Use Case: BIM

Overriding Objective

- Streamline work order process for skilled trades personnel
- Improve information gathering process to ultimately save resources and increase efficiency across Operations Division

Solution

- Modeled 150 campus building with high detail exterior, low detail interior
- Added mechanical equipment requiring routine maintenance to model
- Standardized critical CMMS attributes and information and automated flow from CMMS to BIM
- Removed information access barriers and replaced with visualization and planning tools
- ROI: Field verification reduced (less gas and time costs), facilities library staff time reduced (searching/printing), paper no longer needed

Use Case: BIM

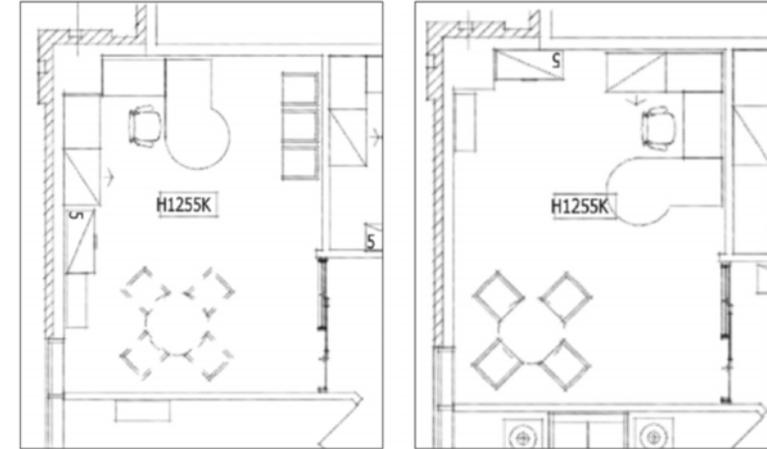

Overriding Objective

- Enhance planning and communication resulting in improved quality and speed of decision-making
- Better quality and more current drawings and data; improved ability to communicate space data and design intent

Solution

- Customers easily share furniture layouts, minor renovations, signage, etc. in 3D without engaging consultant
- More effectively communicate office layout options to incoming senior leaders

Before

After

BIM – Key Strategies

- Establish Leadership (direction) and Department (data) Alignment
- Determine What “I” is Needed [\[Audit\]](#)
- Develop Roadmap
- Define Processes and Procedures (two way information exchange) [\[Process\]](#)
- Partner with IT
- Develop Design Deliverable Standards and System Standards [\[Standardize\]](#)
- Automate workflows [\[Automate\]](#)
- Outreach and Education

Graphic created by:

IWMS – Integrated Workplace Management System

\ˈɪ-, ˈdə-bəl-(,)yü, ˈem, ˈes\

IWMS is....

- A single platform software that streamlines processes for end-to-end facilities management
- Designed to offer robust reporting to define KPIs and strategically improve operations
- Consumes and gives meaning IoT big data
- Integrates five functional domains:
Real Estate & Property Management | Facilities & Space Management
Operations & Maintenance | Capital Planning & Project Management
Energy Management & Sustainability

IWMS is NOT...

- Just a CAFM
- A software for integrating silo systems
- GIS, BIM, or BAS (integration may require customization)

IWMS is a CAFM plus

Graphics

CAD

GIS

BIM

Content

Space Management

Real Estate Planning

Project Management

Building Operations

Preventative
Maintenance

Energy Management
and Sustainability

Functionality

Planning Tools

Performance Metrics

Integrated

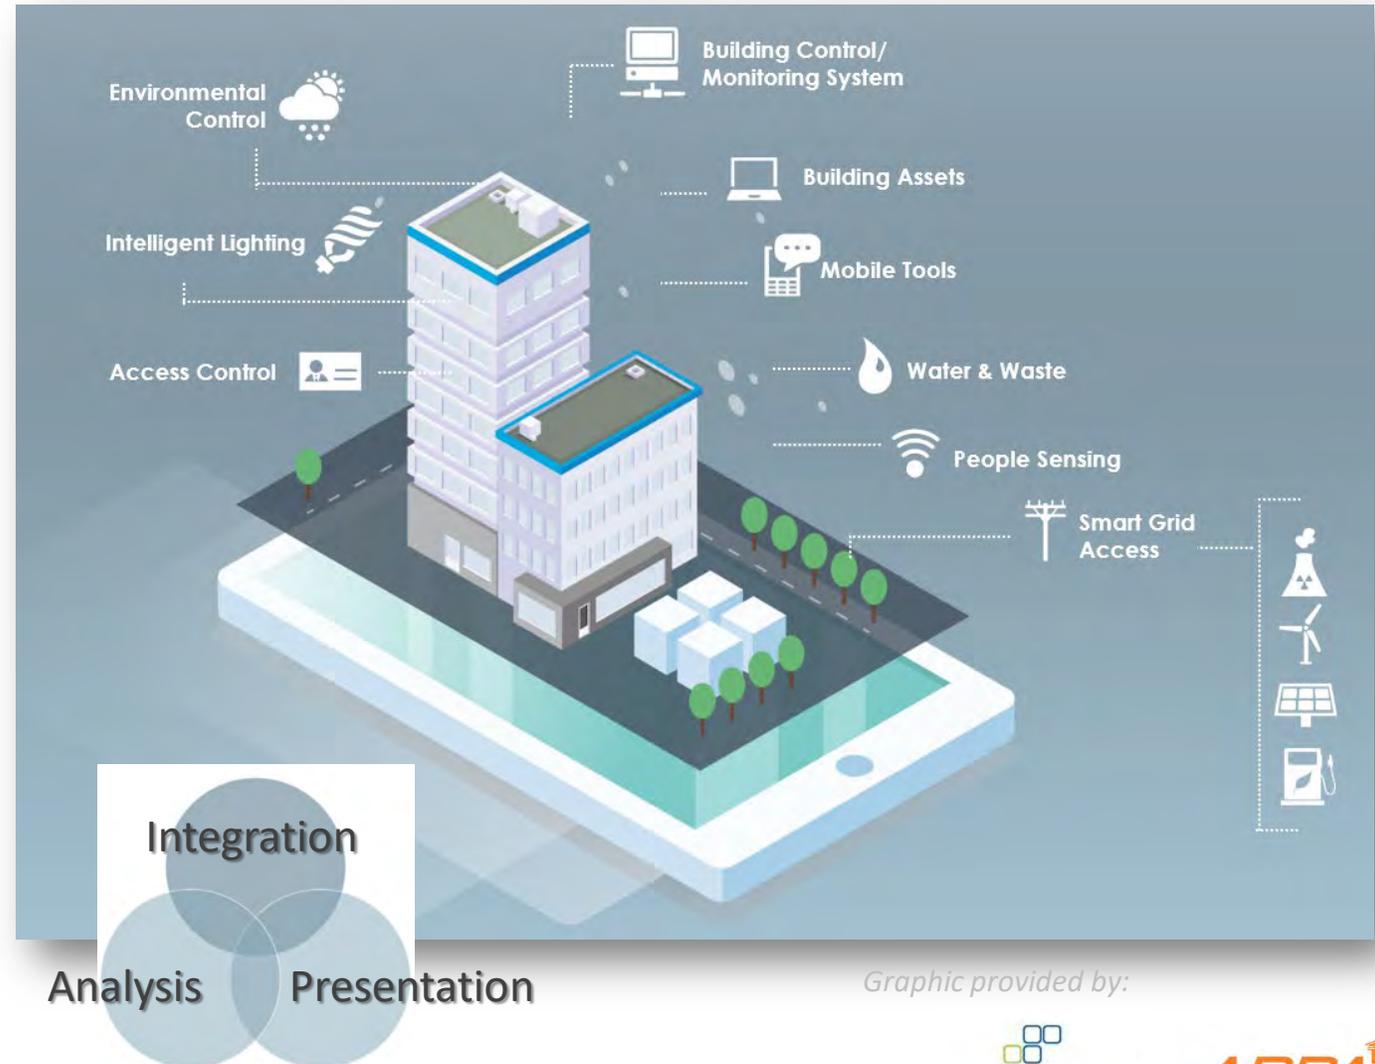

Workflow

Advanced Functionality

Why IWMS?

- Cost Containment
- Turns Data Into Information
- Data Drives Decisions
Information → Optimization
- Enables Transition from Reactive
WO State to Predictive
- Reduces Silo Systems

IWMS – Participating Stakeholders

Graphic provided by:

Use Case: IWMS

Situation

Strict reporting requirements to the State and Federal government that determine funding for the institution and negotiation of the facility and administrative rate for federal grants.

Result

IWMS implementation has allowed UNT to track locations of their research space and equipment and use it to associate grants to space and private investigators to help with both federal reporting and determination of productivity of existing research space.

Building 0140

Room 011

* Department Correct? Yes

* Space Use Correct? Yes

* Room Dimensions Changed? No

Capacity 0

* Required Field

Graphic provided by:

Use Case: IWMS

Situation

Wanted to improve control over maintenance practices with accurate, detailed records of reactive maintenance workload. Needed to measure effectiveness, identify capacity gaps, and connect internal and external trade engineers to help dispatch and execute work more efficiently.

Result

System offers transparency into maintenance backlog, health & safety issues, compliancy risks, and capacity gaps and has moved from a reactive to preventative maintenance model. Maintenance backlog reduced by 50% within 3 months.

Graphic provided by:

IWMS – Key Strategies

- Identify Internal Champion
- Define Vision that Aligns with your Campus Mission and Values
- Define Realistic Scope and Strategic Roadmap
- Define Data Ownership and Workflows [\[Audit\]](#)
- Develop Process & Procedures [\[Process\]](#)
- Develop Standards [\[Standardize\]](#)
- Nurture Relationships
- Partner with IT
- Education & Outreach
- Open Visibility
- Configure Reports and Workflows [\[Automate\]](#)

Beware of systems that say they are an IWMS but aren't

FIM Management Strategies

Lean Management | Continuous Improvement

Organizational Structure

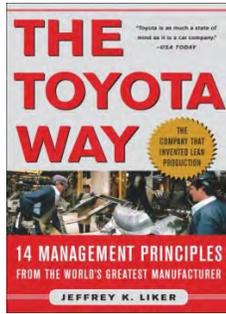

Why Lean?

- Process Improvement is Endless
- Propagates Change Management Mindset
- Employee Empowerment
- Scalable
- Long-term Sustainability
- It's the Right Thing (for the customer, for the employee, for the organization...)

The Toyota Way

Note: many others are analyzing Lean in addition to Liker. TTW is just one example.

1. Base your management decisions on a **long-term philosophy**, even at the expense of short-term financial goals.
2. Create a **continuous process flow** to bring problems to the surface.
3. Use **“pull” systems** to avoid overproduction.
4. **Level out the workload** (work like the tortoise, not the hare).
5. Build a culture of **stopping to fix problems**, to get quality right the first time.
6. **Standardized** tasks and processes are the foundation for **continuous improvement** and employee engagement.
7. Use **visual controls** so no problems are hidden.
8. **Use only reliable, thoroughly tested technology** that serves your people and process.
9. **Grow leaders** who thoroughly understand the work, live the philosophy, and teach it to others.
10. **Develop exceptional people and teams** who follow your company’s philosophy.
11. **Respect your extended network of partners** and suppliers by challenging them and helping them improve.
12. **Go and see for yourself** to thoroughly understand the situation.
13. **Make decisions slowly by consensus**, thoroughly considering all options; implement decisions rapidly.
14. **Become a learning organization** through **relentless reflection** and continuous improvement.

Lean – Nuts & Bolts

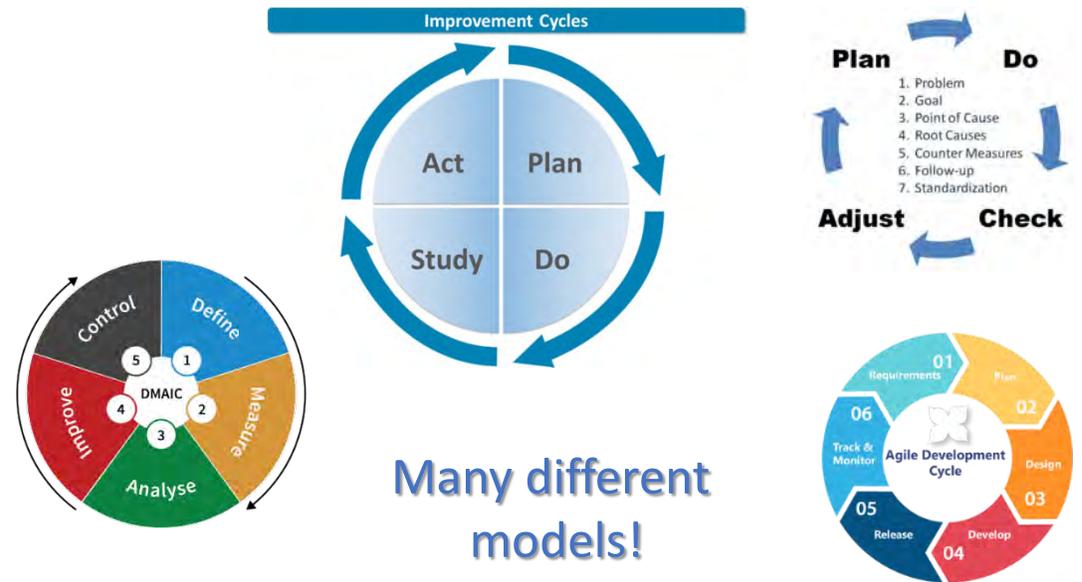

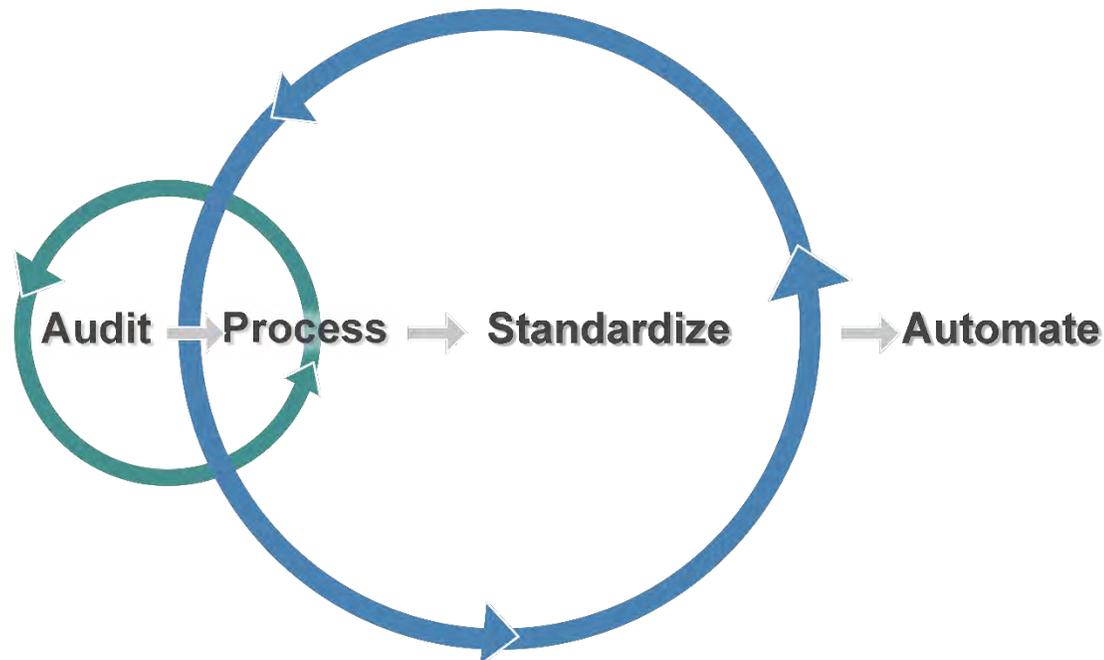

Note: criteria listed represent a subset of available items under the four (4) Nuts and Bolts steps and are listed for discussion purposes only.

- 1** Audit
- Information
 - Data
 - Systems
 - Resources
 - Outputs
 - Processes

- 2** Process
- Workflow diagrams
 - Support documentation
 - Checklists
 - Request forms

- 3** Standardize
- Libraries
 - Templates
 - Technical Standards
 - Design Standards
 - Manuals
 - Policies

- 4** Automate
- Desktop tools
 - Web applications
 - Mobile apps
 - System integrations
 - Report generation
 - Other customizations

Many different models!

Use Case: Lean Office

Situation

100's of map requests at varying times throughout the year with various levels of urgency. Many last minute submitted by email or walk-in. Time consuming to make and hard to find errors. Required technical expertise and extensive PM to ensure quality and customer service expectations were met.

Result

Developed standards, templates, workflows, and training pathways to level out the workload and enable student workers with no mapping experience to develop 75% of recurring map requests. Developed self-service solutions for end users to develop maps of interest and access information.

Use Case: Lean Office

1 Audit

Document past three years of map products and look for common trends in sizes, colors, map elements, request times, recurring tasks, errors...

Size	Orientation	Style	Collar	Base Map	Color
8.5x11	Portrait Landscape	Decorative Utility Planning Space Usage Map Book	Top Bottom Floating	2D 2.5 D Aerial	Grey Black/White Blue/Green Blue/Grey Lime/Peach Tan/Green Green/Green

REFERENCE PANEL		*Contact Date	Date: Target	Anticipated Priority	Deadline Constraint	Project Name (required)	SOW Type (required)	General Purpose
Scheduling		8/29/2016	10/1/2016	Medium		PPD Utilities Maps		Printable and Interactive, as needed. This project may change (as of 5-2016, maps are updated monthly)
ANALYST send project details		8/29/2016	10/1/2016			Inspection Survey		
Begin Project		12/28/2016	2/1/2017	Low		Electric Light	Mapbook	
Send Draft		4/27/2017	6/1/2017	Low		Building Groundshots	Project	
Send Final		4/27/2018	6/1/2018	Low		Aerial Campus	Map	Ensure that the most current aerial imagery is provided for fitness mounting for various parties.
CELL FORMATING		5/28/2018	7/1/2018	Low		FIS Selected Computer IDs	Map	Inventory FIS department computer IDs and related location/user information
Manual Entry Required		5/28/2018	7/1/2018	Medium	HARD	BAO Renewal	Project	
Initialization - Heads Up	mm/dd/yyyy	5/28/2018	7/1/2018	Medium		Printable Map Updates (All)	Map	Provide printable maps to the UK community via the Campus Maps and PPD web pages.
Initialize - Approaching	mm/dd/yyyy	5/28/2018	7/1/2018	HIGH		Fall Move-In	Map	Provide a set up maps to support move in efforts prior to the fall semester.
Initialize - Now	mm/dd/yyyy	5/28/2018	7/1/2018	Medium	HARD	CBMI	Map	Provide maps to insert into the conference brochure provided annually to national participants
Initialize Asap	mm/dd/yyyy	6/11/2018	7/15/2018	HIGH	HARD	CBMI Facilities Tour Presentation	Presentation	Prepare a brief presentation to share with CBMI 1st year attendees on the Facilities Tour
Manually Followup	mm/dd/yyyy	6/11/2018	7/16/2018	Medium	HARD	Bicycle Facilities	Map	
*[Cell Name]	(Locked Column)	6/26/2018	7/31/2018	Medium		Blackboard Mobile App Basemap		Provide a basemap for the BB UK Mobile App.
Manual Entry Required		6/27/2018	8/1/2018	Medium		Main Campus Libraries	Map	Update UK Libraries map (version for web print, possible version for brochure)
Initialization - Heads Up	mm/dd/yyyy	6/27/2018	8/1/2018	Low		UKPD Patrol Districts	Map	Update with new basemap and data, as needed.
Initialize - Approaching	mm/dd/yyyy	6/27/2018	8/1/2018	Medium		Stadium Buffers	Map	Provide UKPD with a map of Commonwealth Stadium with distance buffers to support football season.
Initialize - Now	mm/dd/yyyy	6/27/2018	8/1/2018	Low		Campus Road Ownership	Map	If needed, update the campus road ownership data and map to reflect data.
Initialize Asap	mm/dd/yyyy	6/27/2018	8/1/2018	Low		Interactive Campus Map Updates	Map	Update the interactive map, help guide, and any other components
Manually Followup	mm/dd/yyyy	6/27/2018	8/1/2018	HIGH	HARD	K Week	Map	Update the K Week map/basemap
*[Cell Name]	(Locked Column)	6/27/2018	8/1/2018	Medium		Parking - Game Day	Map	
Manual Entry Required		7/11/2018	8/15/2018	Medium		Printable Map Updates (Campus Wall Sketch with Index)	Map	Updated the popular Campus Wall Sketch Map with Index (Color) printable map and provide to the UK community
Initialization - Heads Up	mm/dd/yyyy	7/30/2018	9/1/2018	Medium		Waste Containers Map Set		Provide waste management teams with a map set showing location of waste containers which they are responsible for
Initialize - Approaching	mm/dd/yyyy	8/6/2018	9/10/2018	HIGH		Annual Bicycle Count Support		Support the annual bicycle counts with configuration of a Collector environment, pre-collection day training, coordinate
Initialize - Now	mm/dd/yyyy	8/27/2018	10/1/2018	Medium		Data Request Updates - Fall	Project	Update the data content used for data request distribution per the Data Request Form and Campus Admin download
Initialize Asap	mm/dd/yyyy	9/10/2018	10/15/2018	Low		eBARS Building Info Dump	Data	Update the eBARS info from which others pull info.
Manually Followup	mm/dd/yyyy	9/10/2018	10/15/2018	Low		MPPD Buildings	Map	Provide maps of Main Campus, Eastern State Hospital, and Spadistop to show MPPD Buildings.
*[Cell Name]	(Locked Column)	9/10/2018	10/15/2018	HIGH		CPFD Snow Removal Support	Mapbook	Provide the groups involved in snow removal with supporting maps to facilitate efficient removal efforts
Manual Entry Required		9/10/2018	10/15/2018	HIGH		MPPD Snow Removal	Map	Provide the groups involved in snow removal with supporting maps to facilitate efficient removal efforts
Initialization - Heads Up	mm/dd/yyyy	9/17/2018	11/1/2018	Medium		Tobacco Free Boundary/Map Update		Update the tobacco free boundary used in the interactive web map. Offer website updates, if needed.
Initialize - Approaching	mm/dd/yyyy	9/27/2018	11/20/2018	Medium		Work Orders by Zone	Map	Show the work order zones on the campus basemap to facilitate accurate billing and operations
Initialize - Now	mm/dd/yyyy	9/27/2018	11/1/2018	Medium		Buildings By Floor - All Maintenance Groups	Map	Maintain a map that shows the building maintenance groups for the Lexington Main Campus. Include an index. Update

Use Case: Lean Office

1

Audit

Document past three years of map products and look for common trends in sizes, colors, map elements, request times, recurring tasks, errors...

2

Process

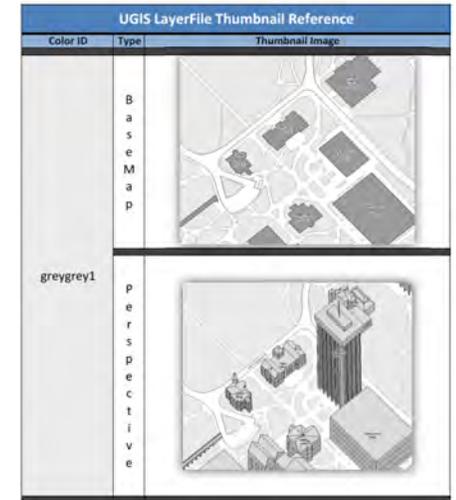

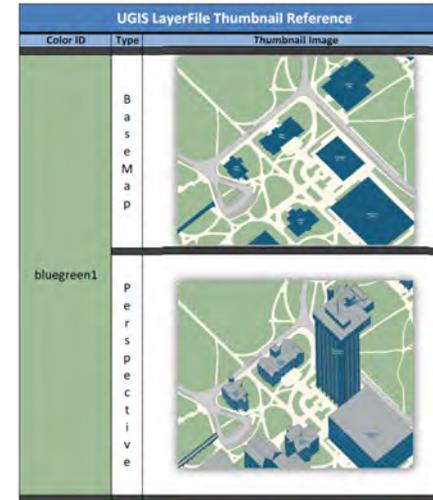

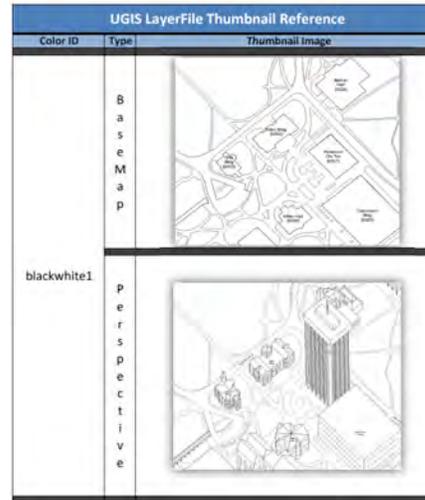

Workflow diagram, QC form, PM map request tracking process...

3

Standardize

Color styles, templates, quality...

Map Quality Standards

Purpose

To ensure balance between map development quality and efficiency

Quality Control

Items that pertain to ALL map products:

- MRF Usage
- Clear Information
- Client Satisfaction
- Template Deviations reviewed by the GIS Coordinator

High Priority Requests

If the required reviewers are not available and there is a deadline, handle by requesting a review from someone at the same level or above. For example, if the GIS Analyst is not available than the Coordinator can review. If the Cartographic Lead is not available, then the GIS Analyst can review.

Quality	High	Medium	Low
General Criteria	Publication Grade	Working/Planning Map	Working/Planning Map
Example Products	<ul style="list-style-type: none"> • Visitor Map • Brochures 	<ul style="list-style-type: none"> • Work Order Zones • Parcel Map (for reference) 	<ul style="list-style-type: none"> • Custodial Teams • Parcel/Utilities AOI (quick)
Minimum Reviews	<ol style="list-style-type: none"> 1. PM 2. TA 3. Cartographic Lead 4. GIS Analyst -or- GIS Coordinator 	<ol style="list-style-type: none"> 1. PM 2. TA 3. Cartographic Lead 	<ol style="list-style-type: none"> 1. PM 2. Cartographic Lead
Comments		<ul style="list-style-type: none"> • Standard Map Request • Default Quality 	<ul style="list-style-type: none"> • "15 Minute Map" • Must Use Existing Templates

Use Case: Lean Office

Lean – Key Strategies

- Requires Top-Down Support
- Prepare People for Change
- Introduce Lean Principles
- Small Cycles of Change
- Use “Lean Nuts and Bolts” as a Beacon
- Reward Effort
- Celebrate Achievements

Organization Management Strategy

- Information Services Area
- System Technologists
- System and Data Governance
- Operational Standards
- Multiple Funding Sources
- Customer Service Driven
- Facilities Processes Include Support From Information Services Area
- Empower Leadership

Organization Management Strategy

Facilities Information Services (FIS)

This org chart represents one recommendation of a facilities information services department structure. It is neither complete or inclusive of all position types or information areas required for successful FIM execution.

Achieving FIM Excellence: Conclusion

Digital Transformation & Smart Campus Design

Final Thoughts

Contributing Thought Leaders

Achieving FIM – Digital Transformation & Smart Campus Design

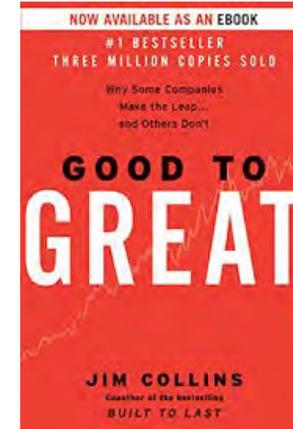

80% of people who are in a digital transformation process say improving processes that expedite changes is their top initiative. 63% say that culture is the number one barrier.

- Results from
The 2014 State of Digital Transformation Survey

Final Thoughts

- Marathon Not a Sprint
- 90% Planning | 10% Implementation
- Apply *Good to Great* Concepts
- Put Your Best People On Your Biggest Opportunities
- Start Small
- Partner With IT
- Be a Champion

“The enemy of great is good because good is “good enough.”

- Jim Collins, *Good to Great*
